JAY ABBASI
ACCELERATE YOUR EVOLUTION

Pronunciation: Jay "Ah-Bah-See"

I'm excited to introduce today's keynote speaker!

Jay Abbasi is a TEDx speaker, former Tesla leader, and host of the podcast Unstuck, who's worked with leaders at organizations like Google, Amazon, and Johnson & Johnson.

But before taking the stage, Jay spent years behind the scenes at Tesla, leading national training programs for over 1,000 employees.

And while his career taught him a lot about leadership and high performance, some of his greatest lessons came from navigating life's most difficult moments.

Today, he combines those experiences with powerful storytelling, human psychology, neuroscience, and practical strategies to help people lead, adapt, and perform at their best.

And as Jay likes to remind us, the answer to more pressure isn't more pushing.

Please join me in welcoming Jay Abbasi!
